Let's transform the **Classrooms** to **Playrooms** with **PopKorn**

We have covered over

1,00,000+

Users,

700+

Schools

5000+

Teachers,

in a span of 3 years.

Karishma Sanghvi
CEO & Founder

From the Desk of PopKorn Mom

Fun, Joy, Play, Toys, Colours are such words that come to my mind when I refer to KIDS. I would say PopKorn is a perfect blend of all these with an essence of learning. Our products are designed in such a way that kids experience learning while playing. At the same time, it prepare Kids for the next levels.

We have the effective solutions that ignite interest towards learning and can even develop social and cognitive skills along with academics. We have created opportunities where children can enhance their language and communication skills.

We provide teachers a navigation network strengthen by supportive solutions to save their time and energy by handing over an organized syllabus and providing tools that would help them to create a playful and effective teaching.

We insist to transform the classrooms into playrooms, where teachers would excel in teaching and kids would enjoy learning.

It is quite common that parents of pre-schoolers are very keen to be an active part of their child's academics, so we have built Mobile Applications for parents, where they would be provided with the right tools to spend quality ACADEMIC time with their little ones. We call it 'WE TIME'

Above all, we have a "Content Research Team" to help the teachers by solving any query regarding the content. We also have a training team who guide teachers to bring Effective Learning Outcome. Moreover, we always try our best to be in touch with renowned educators and keep our solutions updated and upgraded to cope with the need of today's generation.

**Thank you for Being a
Preschool Educator.**

PopKorn Creates A Perfect Synergy of Preschool Stakeholders
